

## Dias Raihan Ichsandy

I am a persistent industrial engineer. Experience four years as a reliable quality control analyst at a pharmaceutical company. Has completed RevoU full stack data analytics course for 3 months.). My background and experience make me have a strong analytical skill. I really like problems, and I love how the power of data can solve them. I am also a fast learner when it comes to computer skills. Those things make me really interested in career shifting as a data analyst.
